SIKO PUMP, specialized chemical handling pump manufacturer ([www.sikopump.com](http://www.sikopump.com))  
metering pump, magnetic driving pump, diaphragm pump, bellows pump, rotary pump... ...

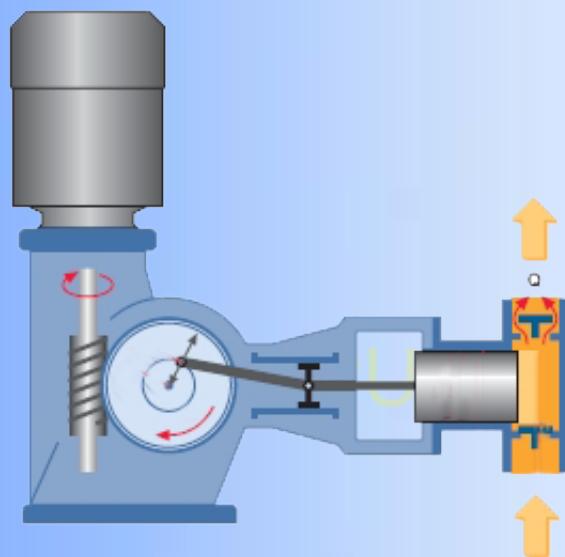

## Introduction of Metering Pump

The metering pump is a positive displacement chemical dosing device with the ability to vary capacity manually or automatically as process conditions require. It features a high level of repetitive accuracy and is capable of pumping a wide range of chemicals including acids, bases, corrosives or viscous liquids and slurries.

The pumping action is developed by a reciprocating piston which is either in direct contact, with the process fluid, or is shielded from the fluid by a diaphragm. Diaphragms are actuated by hydraulic fluid between the piston and the diaphragm.

Metering pumps are generally used in applications where one or more of the following conditions exist:

- Low flow rates in l/hr or GPH are required
- High system pressure exists
- High accuracy feed rate is demanded
- Corrosive, hazardous, or high temperature fluids are handled
- Viscous fluids or slurries need to be pumped

## Working Principle of the Metering Pump

Metering pumps normally comprise of a motor, gearbox and pump head. The gear reduces the motor speed and converts the rotary motion into a reciprocating movement of a plunger in the pump head.

The plunger movement generates a stream of liquid utilizing a suction and discharge valve that are opened and closed alternately. Suction and discharge valves are self-acting.

Flow rate of a metering pump is basically defined by the plunger diameter, stroke length and stroking speed.

## Type of Metering Pump(Liquid end)

Usually the metering pumps are divided into three types, according to the metering pump Liquid End Structure:

**Piston/plunger Metering Pump**--In this type metering pump, the liquid end is just the piston, so the piston will contact the liquid directly. The pump structure is simple, but need packing seal for the piston, and also the piston type pump can reach a high pressure

**Mechanical Actuated Diaphragm Metering Pump**--In this type pump, the liquid end is changed into a diaphragm. So the liquid is completely separated. It is widely used for Corrosive, hazardous liquid. But this pump pressure can be no very high

**Hydraulic Actuated Diaphragm Metering Pump**--Similar as the mechanical diaphragm type, the liquid is completely separated, and by apply the hydraulic power, it can get much higher pressure than the mechanical type.

In this catalogue, we will discuss

**Piston/plunger Metering Pump**

## Common Drive Mechanism(Drive mechanism end)

As for the metering pump drive mechanism end, usually they have a similar structure. The worm wheel and worm transfer the motor's rotating movement into piston/plunger's reciprocating movement

**MPP piston/plunger metering pump features****High pressure**

Piston/plunger type metering pump has the highest pressures among all the metering pumps, it can reach 50MPa pressure. So it can be high pressure pump as well.

**Self-priming**

It has simple structure, so easy maintenance need. Because of its special structure, it has a very strong self priming ability; it can be installed above the liquid level.

**Washing seal**

Piston/plunger metering pump has a seal, so it is not suitable for the dangerous chemical liquid delivery. With washing seal, a long service time can be achieved.

**Heating jacket**

The pump head can be insulated a heating or cooling jacket, so this pump is very suitable for the high temp. liquid delivery. Heating model can be hot water and so on.

- ◆ Pump has a seal, it needs to be adjusted and replaced periodically. Pump is not suitable for the dangerous liquid
- ◆ Pump head material(liquid end): SS304, SS316, and SS304 lined PTFE (body is SS304, but all wet part lined PTFE)
- ◆ No safety drain device insides pump, so it is suggested to install an safety valve on the outlet pipe
- ◆ Media Temperature: -30 to 120 degree(can be with heating/cooling jacket)

- ◆ Capacity range: 2.5 L/H to 9000 L/H
- ◆ Pressure range: 0.6 Mpa to 50 Mpa
- ◆ Connection size: 6 mm to 40 mm
- ◆ Power range: 0.37 kw to 4 kw
- ◆ Plunger diameter size: 6 mm to 110 mm
- ◆ Viscosity range: 0 to 1000mm<sup>2</sup>/s
- ◆ Steady state accuracy: +/- 1%
- ◆ Suggested adjustment range: 30% to 100%

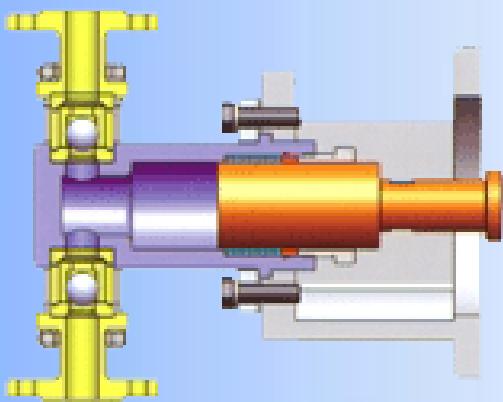

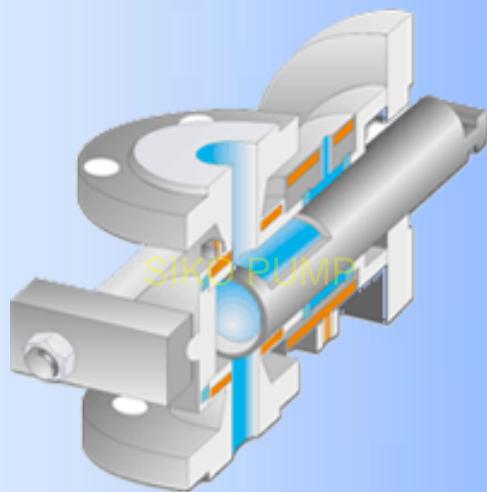

Pump head of plunger is easy, economic with metering accuracy; seal method should be carefully chosen and maintained. The MPP plunger/piston metering pump is suitable for the high pressure situation during the technique progress of oil, pertolization and chemical industry as well as other key process in environment protection, medication, paper making and food industry.

## Piston/plunger metering pump working principles

The packed plunger style liquid end is the only liquid end in which the piston is in direct contact with the process fluid. This direct contact offers a number of advantages, including: high suction and discharge pressure capabilities; high temperature resistance, and lowest NPSH requirements.

The reciprocating piston requires packing to seal the wetted parts from the atmosphere. This simple design is effective, but places limitations on the use of packed plunger pumps in certain applications.

## Optional device/accessories

### ◆ PTFE lined pump head material

If the handling liquid has strong corrosion against stainless steel, a PTFE lined pump is a good replacement. All the pump wet part will be lined with the PTFE material.

### ◆ Heating(or cooling) jacket

To heat or cool the handling liquid, MPP pump can be added the heating/cooling device and their connection valve and flange. Heating media can be hot water, air, steam and so on

### ◆ Remote control

Pump can be also controlled by a remote signal, input/out put signal 4 to 20 mA.

### ◆ Double pump head type pump

With double pump head, pump can reach twice capacity as the single pump head type.

**MPPS Piston Metering Pump**

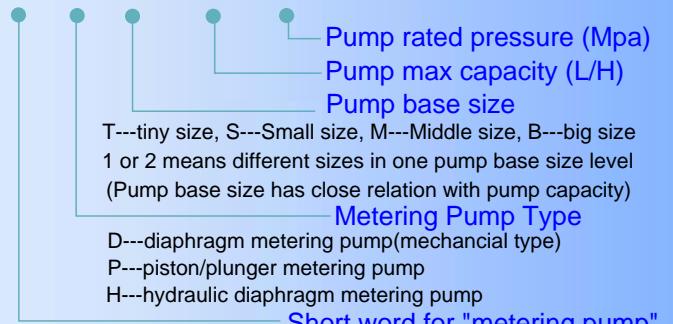

Capacity range: 2.5 L/H to 150 L/H, Pressure range: 0.6 Mpa to 50 Mpa

No.	Model	Capacity	Pressure	Size of piston	stroke	Speed	Power	Inlet/outlet size	Net weight

Pump Identification

**MP P S - 2.5/ 50**

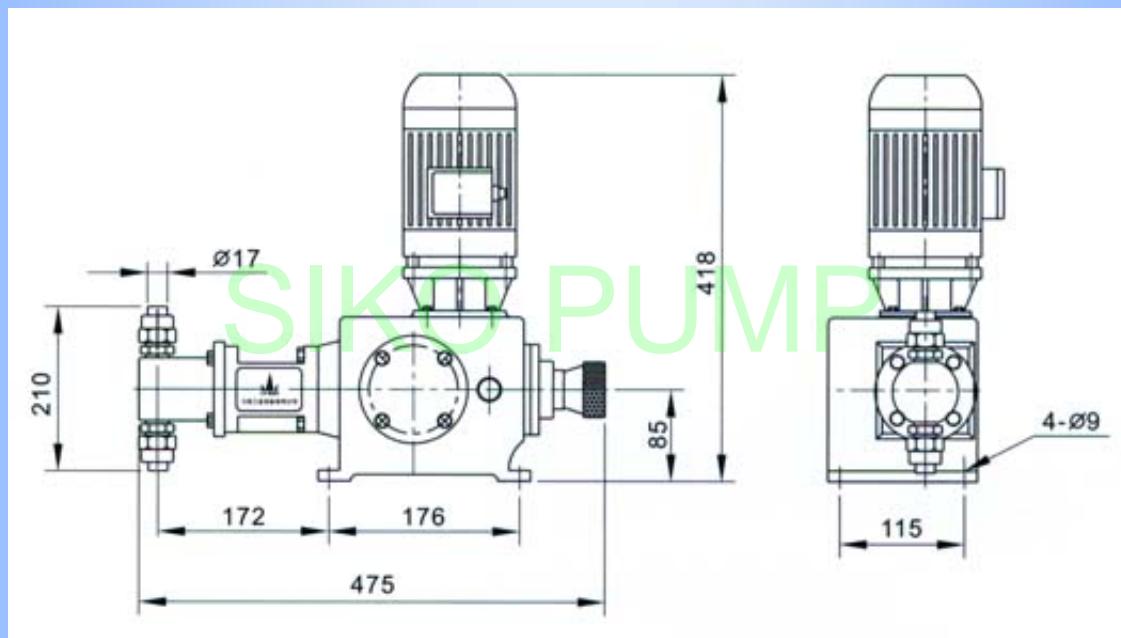

## Material

Spare part	Material
Pump Head	SS304,SS316,PTFE lined SS304
Metering Valve	SS304,SS316
Ball valve	Silicon dioxide,SS304,SS316,Ceramic
Seal	PTFE

## Working condition

- Envir. temperature: -30 to 60 degree
- Liquid temperature: 0 to 120 degree
- Liquid viscosity: 0.3 to 800mm/s
- Electrical source: 1 or 3 phase, 50Hz/60Hz, 220V/380V/440V
- Motor type: IEC, IP45 or IP55(explosion-proof type)
- Adjustment range and accuracy: 10% to 100% at +/- 1%
- Adjust model: by hand.
- Self-priming ability: good.

## Dimension (mm)

## Pump Identification

**MP P M1 - 6/ 40**

● Pump rated pressure (Mpa)  
 ● Pump max capacity (L/H)  
 ● Pump base size

T---tiny size, S---Small size, M---Middle size, B---big size  
 1 or 2 means different sizes in one pump base size level  
 (Pump base size has close relation with pump capacity)

**Metering Pump Type**

D---diaphragm metering pump(mechanical type)  
 P---piston/plunger metering pump

H---hydraulic diaphragm metering pump

**Short word for "metering pump"**

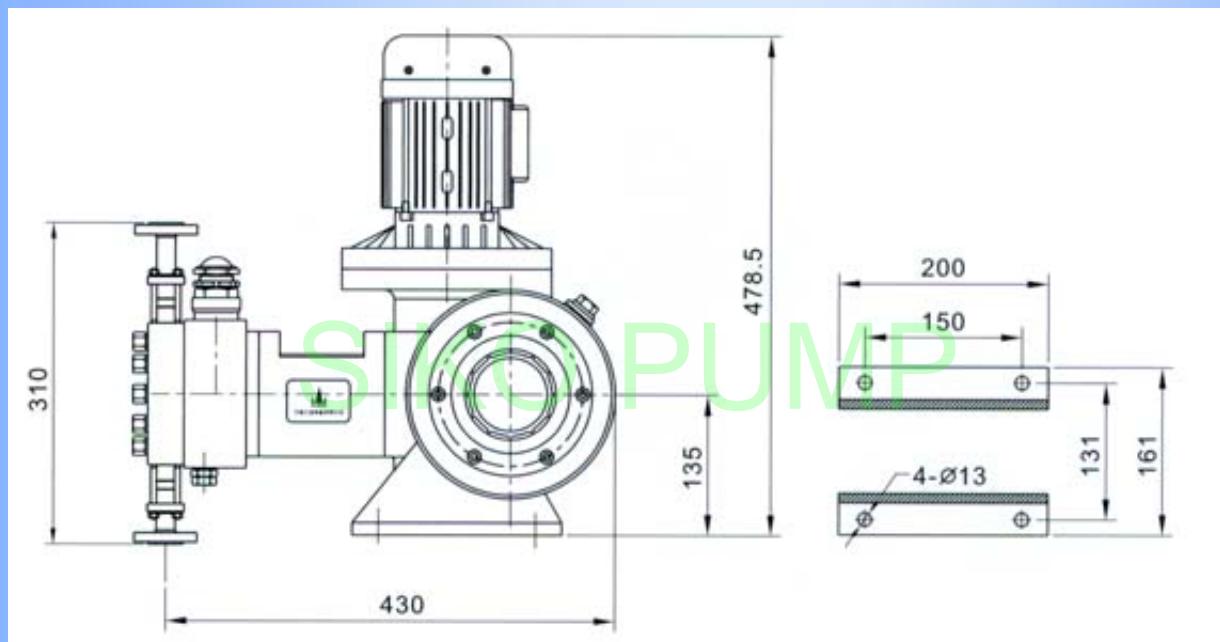

## Material

Spare part	Material
Pump Head	SS304,SS316,PTFE lined SS304
Metering Valve	SS304,SS316
Ball valve	Silicon dioxide,SS304,SS316,Ceramic
Seal	PTFE

## Working condition

- Envir. temperature: -30 to 60 degree
- Liquid temperature: 0 to 120 degree
- Liquid viscosity: 0.3 to 800mm/s
- Electrical source: 1or 3 phase, 50Hz/60Hz, 220V/380V/440V
- Motor type: IEC, IP45 or IP55(explosion-proof type)
- Adjustment range and accuracy: 10% to 100% at +/- 1%
- Adjust model: by hand.
- Self-priming ability: good.

## Dimension (mm)

**MPPM2 Piston Metering Pump**

Capacity range: 6.5 L/H to 1000 L/H, Pressure range: 0.5 Mpa to 50 Mpa

35	MPPB-2250/0.6	2250	0.6	DN110	40	100	4	DN40	175

### Pump Identification

MP P B - 23/ 50

● Pump rated pressure (Mpa)  
 ● Pump max capacity (L/H)  
 ● Pump base size

T---tiny size, S---Small size, M---Middle size, B---big size  
 1 or 2 means different sizes in one pump base size level  
 (Pump base size has close relation with pump capacity)

Metering Pump Type

D---diaphragm metering pump(mechanical type)  
 P---piston/plunger metering pump  
 H---hydraulic diaphragm metering pump

Short word for "metering pump"

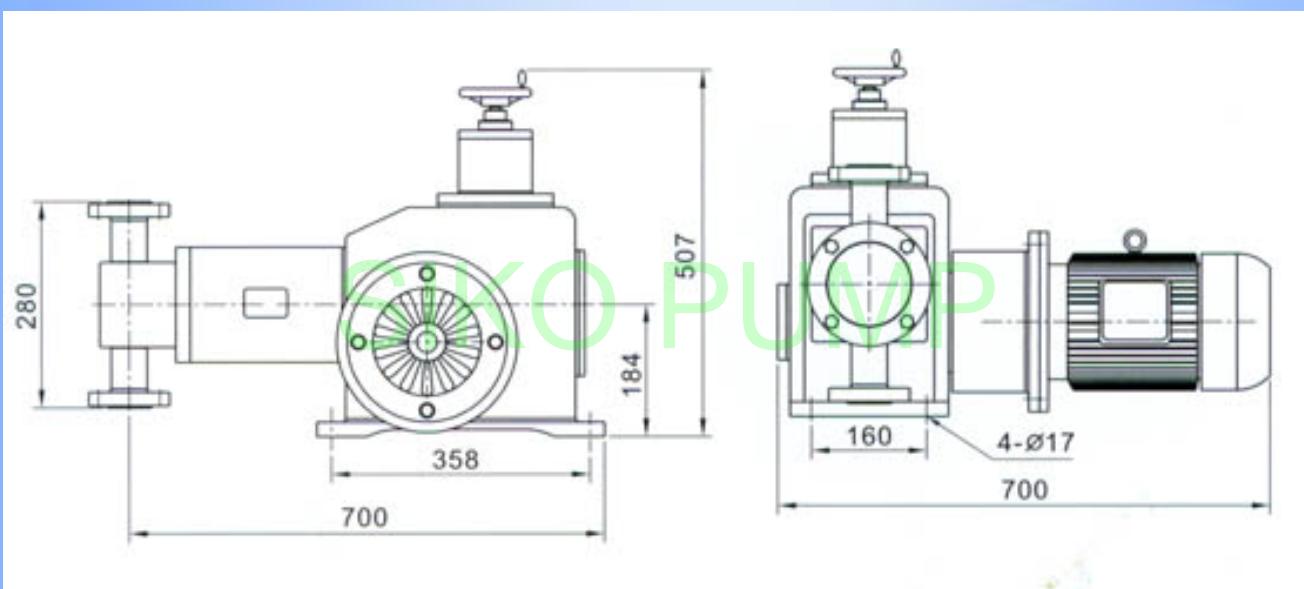

### Material

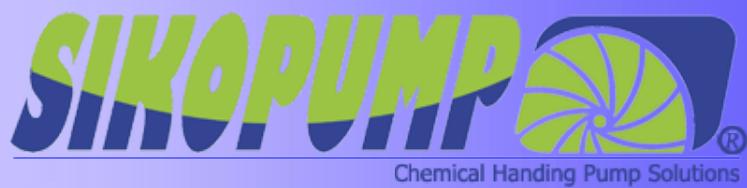

Spare part	Material
Pump Head	SS304, SS316, PTFE lined SS304
Metering Valve	SS304, SS316
Ball valve	Silicon dioxide, SS304, SS316, Ceramic
Seal	PTFE

### Working condition

- Envir. temperature: -30 to 60 degree
- Liquid temperature: 0 to 120 degree
- Liquid viscosity: 0.3 to 800mm/s
- Electrical source: 1 or 3 phase, 50Hz/60Hz, 220V/380V/440V
- Motor type: IEC, IP45 or IP55(explosion-proof type)
- Adjustment range and accuracy: 10% to 100% at +/- 1%
- Adjust model: by hand.
- Self-priming ability: good.

### Dimension (mm)

SIKO PUMP, specialized chemical handling pump manufacturer.

Metering pump, magnetic driving pump, diaphragm pump, bellows pump, rotary pump and so on . . . .

Address: No.518 Jinyuan Road(Jinyuan Industry Park), Shanghai, China

Tel: 0086-21-39109967(direct), Fax: 0086-21-39109968
